ORDER OF COLORING

Color & Weave effects are two types:

1. Simple color and weave effects
2. Compound color and weave effects.

Order of coloring are two types:

1. Simple order of coloring
2. Compound order of coloring.

Order of coloring for warp yarn is called Warping and order of coloring for weft yarn is called Wefting.

ORDER OF COLORING

Simple order of coloring:

In this order of coloring, only *one ratio of color is used either for warp or weft*, such as –

1. *Regular order of coloring*- 4 dark, 4 light; 3 dark, 3 medium, 3 light etc. Same for both warp and weft.
2. *Irregular order of coloring*- 2 dark, 1 light; 3 dark, 2 medium, 1 light etc. same for both warp and weft.
3. *By arranging the weft in a different order from the warp*, for example- 2 and 2 warping crossed with 1 and 1 Wefting.

Compound order of coloring:

In this case *more than one ratio of color* is used either for warp or weft, such as –

1. 2 dark - 2 light and 4 dark - 4 light; 6 dark - 6 light and 3 dark - 3 light etc. Same for both warp and weft.

End and End Coloring Pattern

Weave: 1/1 Plain

Order of Coloring: 1:1

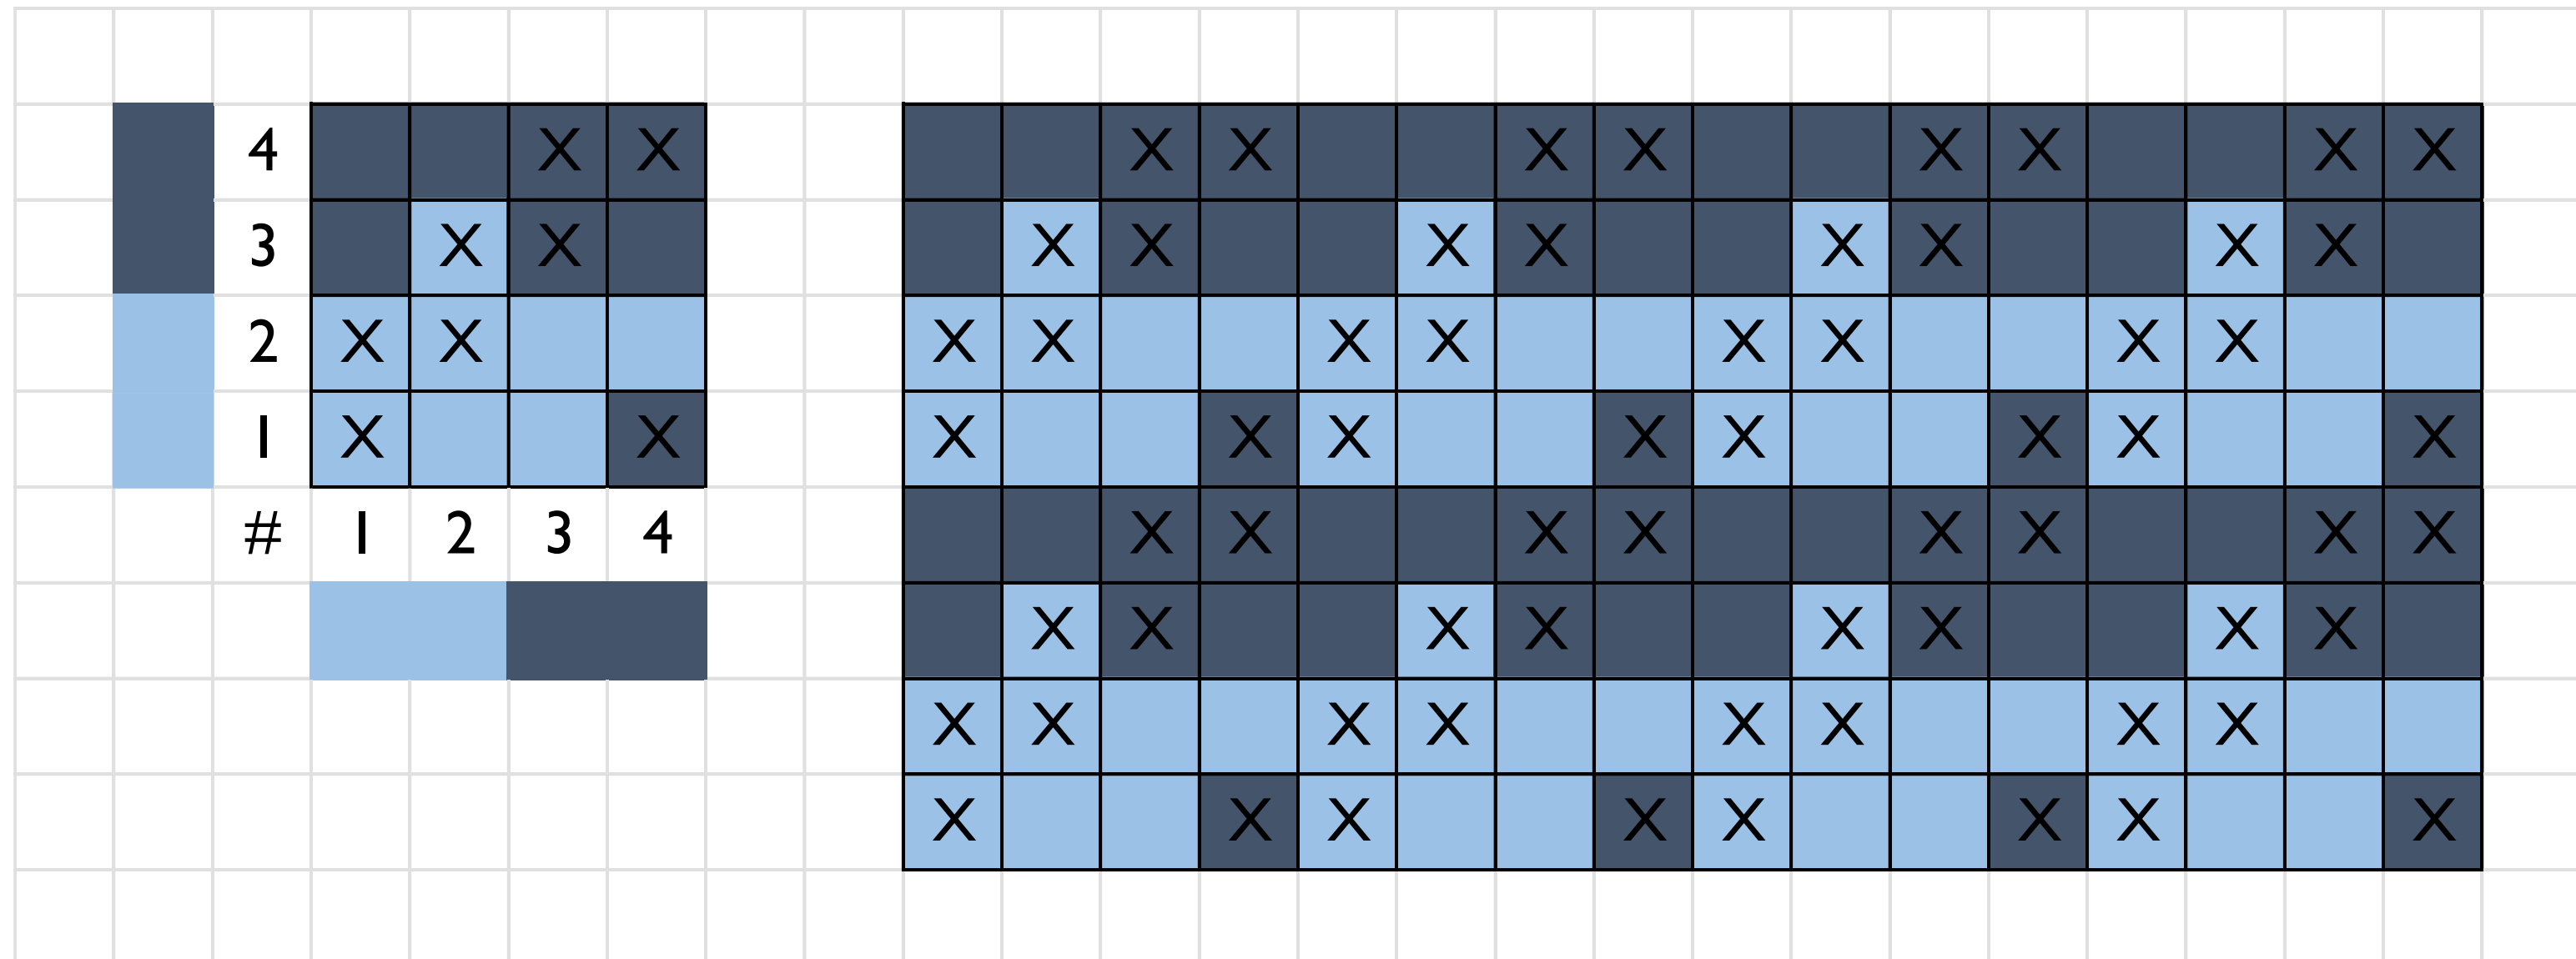

The diagram illustrates two 4x4 grids. The left grid shows a sequence of operations: a dark blue cell, followed by '2', a dark blue cell, and an 'X' in the top row; a light blue cell, '1', a light blue cell with 'X', and a light blue cell in the second row; and an empty cell, '#', a light blue cell with '1', and a dark blue cell with '2' in the third row. The right grid is an 8x8 checkerboard pattern of dark blue and light blue cells, with 'X' marks in the dark blue cells.
